EAZYCUT TRIMMING SYSTEMS

CUTTING EDGE

SOLUTIONS

The **EazyCut** is the perfect solution for the pruning and harvesting of flowers, plants and herbs. The EazyCut combines a competitive price with high savings on labour costs. The EazyCut is lightweight, easy to operate and low maintenance.

EasyCut

TRIMMING SYSTEMS

EAZYCUT 400 | COMPACT TRIMMER

Lightweight harvester including collection bag, Strong 2-stroke engine. Easy to operate with 1 person. With long handles possible to trim close to the ground.

EAZYCUT 600 | BACKPACK OR TRAY TRIMMER

Versatile modular trimming system with multiple options for mounting and various motor options.

- Extremely mobile with backpack mount
- DIY-kit for building your own tray trimming system
- Complete system build on Danish Card or special made frames (with integrated belt).

- With integrated fan for collecting trimmings
- Perfect cutting due to hard steel, self-sharpening fine cutting knives
- Trim, prune and harvest plants and herbs
- Light weight and easy to operate
- Low maintenance and easy ordering spareparts
- Fast return on investment

EAZYCUT 1201F & 1601F | FRAME MODEL

The new basic model with improved bodywork for excellent durability and user safety. The 1201F and 1601F are great to incorporate into your own production line. We also provide standard frames like the EazyFrame, EazyTable or custom made frames.

EAZYCUT CE | HANDHELD PRUNING SYSTEMS

The EazyCut CE versions are available in two widths 1201 and 1601, these lightweight models are carried by two people. The double safety control switch on each of the side handles and stop button ensures safe working for your operators. The EazyCut 1201CE and 1601CE give you great flexibility

EAZYCUT CURVED | TEA & LAVENDER HARVESTER

- The curve of the knife follows the shape of the plants.
- Available in a strong curve with a radius of 1150 mm
- Can also be placed on wheeled frame for easy working.

EAZYCUT VPS 1210-B | WHEELED HARVESTER

- Large 4 wheeled harvester for trimming beds in the greenhouse or on the field
- Operation by 1 person, walking backwards
- The height can be easily adjusted with spindles left and right.
- Wheel gauge adjustable, suitable for most fields
- A supporting plate at the back makes sure the collecting bag does not drag over the crop.
- Lightweight frame for easy riding and turning.

EasyCut FRAME SOLUTIONS

EAZYFRAME

The mobile EasyFrames are lightweight and easy to adjust, both in height and width. The pruning height can be adjusted very accurately with a spindle, creating a perfect cut image.

- Wheeled harvester including collection bag and supporting plate for pushing by 1 or 2 persons.
- Galvanized frame with height adjustment
- Strong 2-stroke engine or electric power (battery or 230V)
- Fit for the EasyCut 1201 and 1601 and curved models

OPTIONS:

Rotating wheels (90°/360°), large wheels, rotating frame for EasyCut, wider or higher frame.

EAZYTABLE

A mobile table frame has been developed for growing benches based on the EasyCut 1201 and 1601. This frame can be easily operated by two people, running over the benches anywhere in the greenhouse. Up to 20 tables can be pruned per hour, leading to enormous cost savings

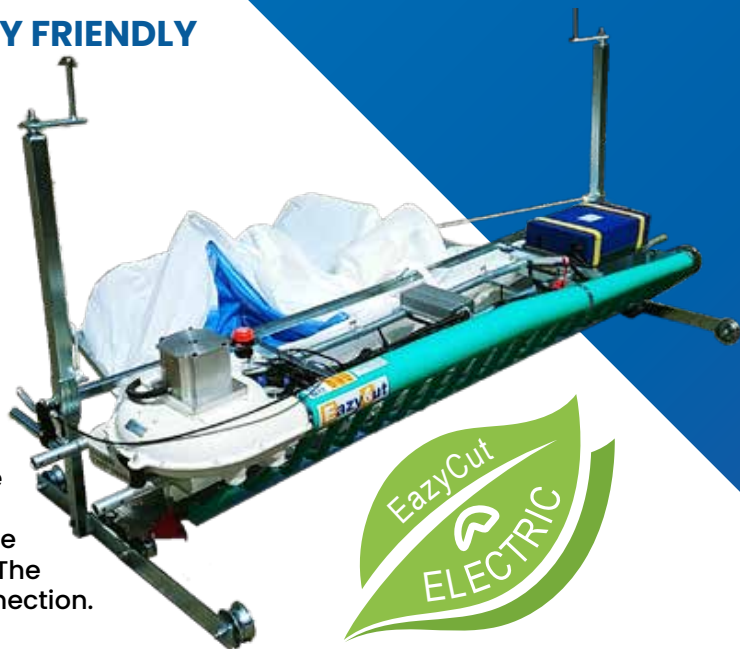

EAZYCUT ELECTRIC | ENVIRONMENTALLY FRIENDLY

By choosing EazyCut Electric, you are helping to reduce harmful air pollution. An EazyCut Electric has zero exhaust emission. If you use renewable energy to recharge your EazyBattery, you can reduce your greenhouse gas emissions even further.

- Suitable for every EazyCut 1201, 1601, VPS 1210-B and curved version
- Silent and non-polluting solution
- Easy battery exchange and quick charging

The EazyCut Electric with EazyBattery has a lower centre of gravity and the weight is evenly distributed which makes operating the machine easy. Due to the addition 6 kg weight we recommend using an EazyTable or an EazyFrame for more effectiveness. The EazyBattery trimming machine works at two speeds. The electric engine can also be powered with a 230V connection.
